VOLUME XXI

JOHANNES MÜLLER :—: AMSTERDAM
:═══: OCTOBER 1919 :═══:

CONTENTS.

ABSORPTION of light (On the influence of different substances on the) by thin tungsten layers. 1078.

ACIDS (The heterocinnamic) of ERLENMEYER JR.. 1048.

AEROPLANE (An instrument to be used by the pilot of an) to measure the vertical velocity of the machine. 468.

AGDUHR (ERIK). Is the post-embryonal growth of the nervous system due only to an increase in size or also to an increase in number of the neurones? 944. 2nd part. 1024.

— Are the cross-striated muscle fibres of the extremities also innervated sympathetically? 1231.

ALLYLBROMIDE (The Addition of Hydrogenbromide to). 90.

AMPHIOXUS (On the Nervus Terminalis from man to). 172.

AMPHIOXUS LANCEOLATUS (On the Anatomy of the Larva of) and the Explanation of its Asymmetry. 1013.

AMPLIFIER (The audion as an). 932.

ANAËROBES (Oidium lactis, the milkmould, and a simple method to obtain pure cultures of) by means of it. 1219.

Anatomy. J. W. VAN WIJHE: "On the Nervus Terminalis from man to Amphioxus". 172.

— A. B. DROOGLEEVER FORTUYN: "The Involution of the Placenta in the Mouse after the Death of the Embryo". 231.

— H. C. DELSMAN: "The egg-cleavage of Volvox globator and its relation to the movement of the adult form and to the cleavage types of Metazoa". 243.

— L. BOLK: "On the topographical relations of the Orbits in infantile and adult skulls in man and apes". 277.

— A. B. DROOGLEEVER FORTUYN: "On two Nerves of Vertebrates agreeing in Structure with the Nerves of Invertebrates". 756.

— EUG. DUBOIS: "Comparison of the Brain Weight in Function of the body Weight, between the Two Sexes". 850.

— ERIK AGDUHR: "Is the post-embryonal growth of the nervous system due only to an increase in size or also to an increase in number of the neurones?" 944. 2nd part. 1024.

— A. A. HUEBER: "On Musculus Transversus Orbitae". 1007.

— J. W. VAN WYHE: "On the Anatomy of the Larva of Amphioxus lanceolatus and the Explanation of its Asymmetry". 1013.

— D. J. HULSHOFF POL: "Experimental cerebellar-atactic phenomena in diseases lying extra-cerebellar". 1095.

M16165
67
1 ex

Anatomy. J. Boeke and J. G. Dusser de Barenne: "The sympathetic innervation of the cross-striated muscle fibres of vertebrates". 1227.

— Erik Agduhr: "Are the cross-striated muscle-fibres of the extremities also innervated sympathetically?" 1231.

— J. G. Dusser de Barenne: "Once more the innervation and the tonus of the striped muscles". 1238.

ANODIC Polarisation (On the Phenomenon of). 1349.

ANTLERS (Androgenic origin of Horns and). 570.

APES (On the topographical relations of the Orbits in infantile and adult skulls in man and). 277.

AQUILA (Investigation of a galactic cloud in). 1323.

ARBITRARY Temperatures and Volumes (On the Equation of State for). Analogy with Planck's Formula. 1184.

ARGON (The ionisation of). 1089.

ASPERGILLUS NIGER (On the course of the formation of diastase by). 479.

Astronomy. W. J. A. Schouten: "On the Parallax of some Stellar Clusters" 2nd Communication. 36.

— W. J. A. Schouten: "The Distribution of the absolute Magnitudes among the Stars in and about the Milky Way". 1st Communication. 518. 2nd Communication. 870.

— A. Pannekoek: "Expansion of a cosmic gassphere, the new stars and the Cepheids". 730.

— J. Woltjer Jr.: "The longitude of Hyperion's pericentre and the mass of Titan". 881.

— W. de Sitter: "Theory of Jupiter's Satellites. I. The intermediary orbit". 1156.

— J. Woltjer Jr.: "On the perturbations in the motion of Hyperion proportional to the first power of Titan's eccentricity". 1164.

— H. Nort: "The distance-correction for the plates of the Harvard Map of the Sky". 1213.

— A. Pannekoek: "Investigation of a galactic cloud in Aquila". 1323.

ATEN (A. H. W.). The Passivity of Chromium. 3rd Communication. 138.

ATOMS (On the Heat of Dissociation of Di-atomic Gases in Connection with the Increased Valency-Attractions $\sqrt{A}$ of the Free). 644.

AUDION (The) as an amplifier. 932.

— (On the use of the) in wireless telegraphy. 1294.

BARENDRECHT (H. P.). Urease and the radiation-theory of enzyme-action. 1126. II. 1307.

BEEGER (N. G. W. H.). Ueber die Teilkörper des Kreiskörpers $K\left(e^{\frac{2\pi i}{h}}\right)$. 454. 2er Teil. 758. 3er Teil. 774.

BEMMELEN (J. F. van). Androgenic origin of Horns and Antlers. 570.

— The value of generic and specific characters, tested by the wingmarkings of Sphingides. 991.

BENZOPURPURIN (On the influence of some salts on the dyeing of cellulose with) 4 B. 893.

BERCKMANS (v. s. f.) and A. SMITS. On the System Ether-Chloroform. 401.

BEYERINCK (M. W.). Oidium lactis, the milkmould, and a simple method to obtain pure cultures of anaërobes by means of it. 1219.

— The significance of the tubercle bacteria of the Papilionaceae for the host plant. 183.

BINARY MIXTURES (On the Occurrence of Solid substance in) with Unmixing. 827.

BINARY SYSTEMS (On Metastable Unmixing and the Classification of). 1055.

BINNENDIJK (A. C.), J. BÖESEKEN and Miss G. W. TERGAU. On the influence of some salts on the dyeing of cellulose with Benzopurpurin. 4B. 893.

BOCKWINKEL (H. B. A.). Observations on the development of a function in a series of factorials. I 428. II. 582.

BODY WEIGHT (Comparison of the Brain Weight in Function of the) between the Two Sexes. 850.

BOEKE (J.) presents a paper of Dr. G. C. HERINGA: "On the Peripheral Sensitive Nervous System". 26.

— presents a paper of Dr. A. B. DROOGLEEVER FORTUYN: "The Involution of the Placenta in the Mouse after the Death of the Embryo". 231.

— presents a paper of Dr. H. C. DELSMAN: "The egg-cleavage of Volvox globator and its relation to the movement of the adult form and to the cleavage types of Metazoa". 243.

— presents a paper of Dr. A. B. DROOGLEEVER FORTUYN: "On two Nerves of Vertebrates agreeing in Structure with the Nerves of Invertebrates". 756.

— presents a paper of Dr. ERIK AGDUHR: "Is the post-embryonal growth of the nervous system due only to an increase in size or also to an increase in number of the neurones?". 944.

— presents a paper of Dr. A. A. HUEBER: "On Musculus Transversus Orbitae". 1007.

— presents a paper of Dr. ERIK AGDUHR: "Are the cross-striated muscle fibres of the extremities also innervated sympathetically?". 1231.

— presents a paper of Dr. J. G. DUSSER DE BARENNE: "The sympathetic innervation of the cross-striated muscle fibres of vertebrates". 1227.

— presents a paper of Dr. J. G. DUSSER DE BARENNE: "Once more the innervation and the tonus of the striped muscles". 1238.

BOER (S. DE). On the influence of the increase of the osmotic pressure of the fluids of the body on different cell-substrata. 151.

BÖESEKEN (J.) presents a paper of Prof. F. E. C. SCHEFFER: "On Phenyl Carbaminic Acid and its Homologues". 664.

— presents a paper of Prof. F. E. C. SCHEFFER: "On the Occurrence of Solid Substance in Binary Mixtures with Unmixing". I. 827.

— presents a paper of Prof. F. E. C. SCHEFFER: "On Metastable Unmixing and the Classification of Binary Systems". 1055.

— presents a paper of Dr. L. HAMBURGER: "Contribution to the knowledge of the removal of restgases, especially for the electric vacuum glow-lamp". 1062.

— presents a paper of Dr. H. P. BARENDRECHT: "Urease and the radiation-theory of enzyme-action". I. 1126. II. 1307.

BÖESEKEN (J.) presents a paper of Prof. F. E. C. SCHEFFER and G. MEIJER: "On an Indirect Analysis of Gas-Hydrates by a Thermodynamic Method and Its Application to the Hydrate of Sulphuretted Hydrogen." I. 1204. II. 1338.

— and W. M. DEERNS. The mutual influence on the electrolytic conductivity of gallic tannic acid and boric acid in connection with the composition of the tannins. 907.

— and CHR. VAN LOON. Determination of the Configuration of cis-trans isomeric substances. 80.

— Miss G. W. TERGAU and A. C. BINNENDIJK. On the influence of some salts on the dyeing of cellulose with Benzopurpurin. 4 B. 893.

BOLK (L.). On the topographical relations of the Orbits in infantile and adult skulls in man and apes. 277.

BORIC ACID (The mutual influence on the electrolytic conductivity of gallic tannic acid and) in connection with the composition of the tannins. 907.

Botany. F. A. F. C. WENT: "On the course of the formation of diastase by Aspergillus niger". 479.

— C. SPRUIT P. PZN.: "On the influence of electrolytes on the motility of Chlamydomonas variabilis Dangeard". 782.

BRAIN-WEIGHT (Comparison of the) in Function of the Body-Weight, between the Two Sexes. 850.

BREAD (Experiments with Animals on the Nutritive Value of Standard Brown-Bread and White-). 48.

BRINKMAN (R.) and H. J. HAMBURGER. The conduct of the kidneys towards some isomeric sugars (Glucose, Fructose, Galactose, Mannose and Saccharose, Maltose Lactose). 548.

BROUWER (H. A.). On the Non-existence of Active Volcanoes between Pantar and Dammer (East Indian archipelago), in Connection with the Tectonic Movements in this Region. 795.

— On the Age of the Igneous Rocks in the Moluccas. 803.

— On Reefcaps. 816.

BROUWER (L. E. J.) presents a paper of Prof. ARNAUD DENJOY: "Nouvelle démonstration du théorème de JORDAN sur les courbes planes". 125.

— Ueber eineindeutige, stetige Transformationen von Flächen in sich. 6ste Mitteilung. 707.

— Remark on the plane translation theorem. 935.

— Ueber topologische Involutionen. 1143.

— Aufzählung der periodischen Transformationen des Torus. 1352.

BROWNIAN MOTION (On the). 96.

— (The Theory of the) and Statistical Mechanics. 109.

— (On the theory of the). 932.

— Movement (On friction in connexion with). 616.

— (On the Theory of the). Appendix. 1057.

BRUYN (C. A. LOBRY DE) and A. SMITS. On the Periodic Passivity of Iron II. 382.

BURGER (H. C.). On the Evaporation from a Circular Surface of a Liquid. 271.

BURGER (H. C.). and L. S. ORNSTEIN. On the theory of the Brownian motion. 922.

BYL (A. J.) and N. H. KOLKMEIJER. Investigation by means of X-rays of the crystalstructure of white and grey tin. I. 405. II. The structure of white tin 494. III. The structure of grey tin. 501.

BYVOET (J. M.) and A. SMITS. On the System Iron-Oxygen. 386.

— and A. SMITS. On the Significance of the Volta-Effect in Measurements of Electromotive Equilibria. 562.

CAPILLARY CONSTANTS (On the shape of large liquid drops and gas-bubbles and the use made of them for the measurement of). 836.

CARBAMINIC ACID (On phenyl) and its Homologues. 664.

CARDINAAL (J.) presents a paper of Prof. J. A. SCHOUTEN: "On the direct analyses of the linear quantities belonging to the rotational group in three and four fundamental variables". 327.

— presents a paper of Prof. J. A. SCHOUTEN: "On the number of degrees of freedom of the geodetically moving system and the enclosing euclidian space with the least possible number of dimensions." 607.

CATALYSIS Part VI. Temperature coefficients of heterogeneous reactions. 1042.

CATH (P. G.). On the measurement of very low temperatures. XXIX. Vapour-pressures of oxygen and nitrogen for obtaining fixed points on the temperature-scale below 0° C. 656.

CELL-SUBSTRATA (On the influence of the increase of the osmotic pressure of the fluids of the body on different). 151.

CELLULOSE (On the influence of some salts on the dyeing of) with Benzopurpurin. 4B. 893.

CEPHEIDS (Expansion of a cosmic gassphere, the new stars and the). 730.

CEREBELLAR-ATACTIC phenomena (Experimental) in diseases lying extra-cerebellar. 1095.

CEREBELLAR ATAXIA as disturbance of the equilibrium-sensation. 637.

Chemistry. J. BÖESEKEN and CHR. VAN LOON: "Determination of the Configuration of cis-trans isomeric substances". 80.

— A. F. HOLLEMAN and B. F. H. J. MATTHES: "The Addition of Hydrogenbromide to Allylbromide". 90.

— A. H. W. ATEN: "The Passivity of Chromium". 3rd Communication. 138.

— A. SMITS: "On the Electrochemical Behaviour of Metals". 158.

— F. M. JAEGER: "Investigations on PASTEUR's Principle concerning the Relation between Molecular and Crystallonomical Dissymmetry". V. Optically active complex-salts of Iridium-Trioxalic Acid. 203.

— F. M. JAEGER and W. THOMAS: "Investigations on PASTEUR's Principle concerning the Relation between Molecular and Crystallonomical Dissymmetry". VI. On the Fission of Potassium-Rhodium-Malonate into Its Optically-active Components. 215. VII. On optically active Salts of the Tri-etylenediamine-Chromi-series. 225. VIII. On the spontaneous Fission of racemic Potassium-Cobalti-Oxalate into its optically-active Antipodes. 693.

— A. SMITS: "The Phenomenon Electrical Supertension". 375.

— A. SMITS and C. A. LOBRY DE BRUIJN: "On the Periodic Passivity of Iron". II. 382

— A. SMITS and J. M. BYVOET: "On the System Iron-Oxygen". 386.

Chemistry. A. SMITS and V. S. F. BERCKMANS: "On the System Ether–Chloroform". 401.
— A. SMITS and J. M. BYVOET: "On the Significance of the Volta-Effect in Measurements of Electromotive Equilibria". 562.
— A. W. K. DE JONG: "On the estimation of the geraniol content of citronella oil". 576.
— F. E. C. SCHEFFER: "On Phenyl Carbaminic Acid and its Homologues." 664.
— F. M. JAEGER and W. THOMAS: "Investigations on PASTEUR's Principle concerning the Relation between Molecular and Crystallonomical Dissymmetry: XVIII. On the spontaneous Fission of racemic Potassium-Cobalti-Oxalate into its optically-active Antipodes." 693.
— J. BÖESEKEN, Miss G. W. TERGAU and A. C. BINNENDIJK: "On the influence of some salts on the dyeing of cellulose with Benzopurpurin 4 B." 893.
— J. BÖESEKEN and W. M. DEERNS: "The mutual influence on the electrolytic conductivity of gallic tannic acid and boric acid in connection with the composition of the tannins". 907.
— NIL RATAN DHAR: "Catalysis Part. VI. Temperature coefficients of heterogeneous reactions." 1042.
— A. W. K. DE JONG: "The heterocinnamic acids of ERLENMEYER JR". 1048.
— F. E. C. SCHEFFER: "On metastable Unmixing and the Classification of Binary-Systems". 1055.
— H. P. BARENDRECHT: "Urease and the radiation-theory of enzyme-action". I. 1126. II. 1307.
— A. F. HOLLEMAN: "EYKMAN's Refractometric Investigations, in Connection with the Presentation of the Edition of his Works". 1200.
— F. E. C. SCHEFFER and G. MEYER: "On an Indirect Analysis of Gas-Hydrates by a Thermodynamic Method and Its Application to the Hydrate of Sulphuretted Hydrogen". I. 1204. II. 1338.
— A. SMITS: "On the Phenomenon of Anodic Polarisation". II. 1349.

CHLAMYDOMONAS VARIABILIS DANGEARD (On the influence of electrolytes on the mobility of). 782.

CHROMIUM (The Passivity of). 3rd. Communication. 138.

CHRONAXIA (The measurement of). 1152.

CIRCULAR SURFACE (On the Evaporation from a) of a Liquid. 271.

CIS–TRANS ISOMERIC SUBSTANCES (Determination of the Configuration of). 80.

CITRONELLA–OIL (On the estimation of the geraniol content of). 576.

COHEN (ERNST) presents a paper of NIL RATAN DHAR: "Catalysis". Part. VI. Temperature coefficients of heterogeneous reactions." 1042.

COLLOIDAL STATE of solutions (On the spontaneous transformation to a) of odorous substances by exposure to ultraviolet light. 131.

CONFUSION (The Psychology of Conditions of). 312.

CONGELATION–phenomena (Melting and) with para-azoxy-anisol. Contributions to the study of liquid crystals. 254.

CONGRUENCES of rays (Null-systems determined by two linear). 309.

COSTER (D.) On the rotational oscillations of a cylinder in an infinite incompressible liquid. 193.

— On the use of the audion in wireless telegraphy. 1294.

COURBES PLANES (Nouvelle démonstration du théorème de JORDAN sur les). 125.

CRYSTAL-STRUCTURE (Investigation by means of X-rays of the) of white and grey tin. I. 405. II. The structure of white tin. 494. III. The structure of grey tin. 501.

CUBIC INVOLUTIONS of the first class. 391.

CUBIC LATTICES (Magnetic properties of). 911.

CYLINDER (On the rotational oscillations of a) in an infinite incompressible liquid. 193.

DAMMER (East Indian archipelago) (On the Non-existence of Active Volcanoes between Pantar and) in Connection with the Tectonic Movements in this Region. 795.

DAPHNIA PULEX (Effects of the Rays of radium on the Oögenesis of). 540.

DEERNS (W. M.) and J. BÖESEKEN. The mutual influence on the electrolytic conductivity of gallic tannic acid and boric acid in connection with the composition of the tannins. 907.

DEGREES of freedom (On the number of) of the geodetically moving system and the enclosing euclidian space with the least possible number of dimensions). 607.

DELSMAN (H. C.). The egg-cleavage of Volvox globator and its relation to the movement of the adult form and to the cleavage types of Metazoa. 243.

DENJOY (ARNAUD). Nouvelle démonstration du théorème de JORDAN sur les courbes planes. 125.

DETECTORS (The Unidirectional Resistance of Crystal). 1248.

DIASTASE (On the course of the formation of) by Aspergillus niger. 479.

DIFFERENTIAL equations (On integral equations connected with). 1269.

DIMENSIONS (On the number of degrees of freedom of the geodetically moving system and the enclosing euclidian space with the least possible number of). 607.

DISSYMMETRY (Investigations on PASTEUR's Principle concerning the Relation between Molecular and Crystallonomical). VIII. On the spontaneous Fission of racemic Potassium-Cobalti-Oxalate into its optically-active Antipodes. 693.

DISTANCE-CORRECTION (The) for the plates of the Harvard Map of the Sky. 1213.

DIVISOR (The primitive) of $x^k - 1$. 262.

DJATI KAPUR [Tectona grandis L.] (On the Secretion of Phosphates in the stems of). 968.

DONDER (TH. DE). Le tenseur gravifique. 437.

DROOGLEEVER FORTUYN (A. B.). v. FORTUYN (A. B. DROOGLEEVER).

DROSTE (J.). On integral equations connected with differential equations. 1269.

DUBOIS (EUG.). The Significance of the Size of the Neurone and its Parts. 711.

— Comparison of the Brain Weight in Function of the Body Weight, between the two Sexes. 850.

DUSSER DE BARENNE (J. G.). Once more the innervation and the tonus of the striped muscles. 1238.

— and J. BOEKE. The sympathetic innervation of the cross-striated muscle fibres of vertebrates. 1227.

EGG-CLEAVAGE (The) of Volvox globator and its relation to the movement of the adult form and to the cleavage types of Metazoa. 243.

EHRENFEST-AFANASSJEWA (Mrs. T.). An indeterminateness in the interpretation of the entropy as log W. 53.

EINSTEIN's theory of gravitation (Calculation of some special cases, in). 68.

ELECTRICAL PHENOMENON (On the Sign of the) and the Influence of Lyotrope series observed in this phenomenon. 417.

ELECTRICAL SUPERTENSION (The phenomenon). 375.

ELECTROCHEMICAL Behaviour (On the) of Metals. 158.

ELECTROLYTES (On the influence of) on the motility of Chlamydomonas variabilis Dangeard. 782.

ELECTROLYTIC conductivity (The mutual influence on the) of gallic tannic acid and boric acid in connection with the composition of the tannins. 907.

ELECTROMOTIVE EQUILIBRIA (On the significance of the Volta-Effect in Measurements of). 562.

EMULSION-PARTICLES (The variability with time of the distributions of). 92.

ENTROPY as log W. (An indeterminateness in the interpretation of the). 53.

ENZYME-ACTION (Urease and the radiation-theory of). 1126. II. 1307.

EQUATION OF STATE (On the) for Arbitrary Temperatures and Volumes. Analogy with PLANCK's Formula. 1184.

EQUILIBRIUM-ORGAN (Our). 626.

EQUILIBRIUM-SENSATION (Cerebellar ataxia as disturbance of the). 637.

ERLENMEYER Jr. (The heterocinnamic acids of). 1048.

ERRATA. 966.

ETHER-CHLOROFORM (On the System). 401.

EUCLIDIAN SPACE (On the number of degrees of freedom of the geodetically moving system and the enclosing) with the least possible number of dimensions. 607.

EVALUATION (On the) of $\xi(2n+1)$. 446.

EVAPORATION (On the) from a Circular Surface of a Liquid. 271.

EYKMAN's Refractometric Investigations, in Connection with the Presentation of the Edition of his Works. 1200.

EYKMAN (C.) and D. J. HULSHOFF POL. Experiments with Animals on the Nutritive Value of Standard Brown-Bread and White-Bread. 48.

FACTORIALS (Observations on the development of a function in a series of). 428. II. 582.

FLÄCHEN (Ueber eineindeutige, stetige Transformationen von) in sich. 6e Mitteilung. 707.

FLORES (On Tin-ore in the Island of). 409.

FOKKER (A. D.). On the equivalent of parallel translation in non-Euclidean space, and on RIEMANN's measure of curvature. 505.

FORTUYN (A. B. DROOGLEEVER). The involution of the Placenta in the Mouse after the Death of the Embryo. 231.

— On two Nerves of Vertebrates agreeing in Structure with the Nerves of Invertebrates. 756.

FRICTION (On) in connexion with Brownian movement. 616.

— of Liquids (On the Theory of the) 743. II. 1283.

FUNCTION (Observations on the development of a) in a series of factorials. 428. II. 582.

FUNDAMENTAL VARIABLES (On the direct analyses of the linear quantities belonging to the rotational group in three and four). 327.

GALACTIC CLOUD (Investigation on a) in Aquila. 1323.

GALLIC TANNIC ACID (The mutual influence on the electrolytic conductivity of) and boric acid in connection with the composition of the tannins. 907.

GAS-BUBBLES (On the shape of large liquid drops and) and the use made of them for the measurement of capillary constants. 836.

GAS-HYDRATES (On an Indirect Analysis of) by a Thermodynamic Method and Its Application to the Hydrate of Sulphuretted Hydrogen. I. 1204. II. 1338.

GASES (On the Heat of Dissociation of Di-atomic) in Connection with the Increased Valency-Attractions νA of the Free Atoms. 644.

GASSPHERE (Expansion of a cosmic), the new stars and the Cepheids. 730.

GELS (On the Photo-electricity of). 1146.

Geology. C. E. A. WICHMANN: "On Tin-ore of the Island of Flores". 409.

— H. A. BROUWER: "On the Non-existence of Active Volcanoes between Pantar and Dammer (East-Indian archipelago), in Connection with the Tectonic Movements in this Region". 795.

— H. A. BROUWER: "On the Age of the Igneous Rocks in the Moluccas". 803

— H. A. BROUWER: "On Reefcaps". 816.

— C. E. A. WICHMANN: "On the Secretion of Phosphates in the stems of Djati kapur [Tectona grandis L.]". 968.

— C. E. A. WICHMANN: "On the Volcanoes in the Island of Tidore (Moluccas)". 983.

GEOMETRY (On the connexion between) and mechanics in static problems. 1176.

GERANIOL (On the estimation of the) content of citronella oil. 576.

GRAVITATION (Calculation of some special cases, in EINSTEIN's theory of). 68.

GROENEVELD MEYER (N. E.). v. MEYER (N. E. GROENEVELD).

GROWTH (Is the post-embryonal) of the nervous system due only to an increase in size or also to an increase in number of the neurones? 944. 2nd. Part. 1024.

GRYNS (G.). Is there any Relation between the Capacity of Odorous Substances of Absorbing Radiant Heat and their Smell Intensity? 476.

HAAK (J. J.) and R. SISSINGH. Experimental Inquiry into the Nature of the Surface-Layers in the Reflection by Mercury, and into the Difference in the Optical Behaviour of Liquid and Solid Mercury. 678.

HAGA (H.) presents a paper of Dr. M. J. HUIZINGA: "The Unidirectional Resistance of Crystal Detectors". 1248.

— and F. ZERNIKE. On thermoelectric currents in mercury. 1262.

HALOS (On the diffraction of the light in the formation of). II. A research of the colours observed in halo-phenomena. 119.

HAMBURGER (L). Contribution to the knowledge of the removal of restgases, especially for the electric vacuum glow-lamp. 1062.

— G. HOLST and E. OOSTERHUIS. On the influence of different substances on the absorption of light by thin tungsten layers. 1078.

HAMBURGER (H. J.) and R. BRINKMAN. The conduct of the kidneys towards some isomeric sugars (Glucose, Fructose, Galactose, Mannose and Saccharose, Maltose, Lactose). 548.

HARVARD MAP of the Sky (The distance-correction for the plates of the). 1213.

HEAT of Dissociation (On the) of Di-atomic Gases in Connection with the Increased Valency-Attractions νA of the Free Atoms. 644.

HERINGA (G. C.). On the Peripheral Sensitive Nervous System. 26.

HERWERDEN (MISS M. A. VAN). Effects of the Rays of Radium on the Oögenesis of Daphnia pulex. 540.

HEYST (F. A. VAN), C. SCHOUTE and N. E. GROENEVELD MEYER. An instrument to be used by the pilot of an aeroplane to measure the vertical velocity of the machine. 468.

HOGEWIND (F.) and H. ZWAARDEMAKER. On the spontaneous transformation to a colloidal state of solutions of odorous substances by exposure to ultraviolet light. 131.

— and H. ZWAARDEMAKER. On the Photo-electricity of Gels. 1146.

HOLLEMAN (A. F.) presents a paper of Dr. A. H. W. ATEN: "The Passivity of Chromium". 3rd Communication. 138.

— EYKMAN's Refractometric Investigations, in Connection with the Presentation of the Edition of his Works. 1200.

— and B. F. H. J. MATTHES. The Addition of Hydrogenbromide to Allylbromide. 90.

HOLST (G.), L. HAMBURGER and E. OOSTERHUIS. On the influence of different substances on the absorption of light by thin tungsten layers. 1078.

— and A. N. KOOPMANS. The ionisation of argon. 1089.

— and E. OOSTERHUIS. The audion as an amplifier. 932.

HOOGEWERFF (S.) presents a paper of Prof. A. SMITS and J. M. BIJVOET: "On the System Iron-Oxygen". 386.

— presents a paper of Prof. A. SMITS and V. S. F. BERCKMANS: "On the System Ether-Chloroform". 401.
